

As a member of WellSense Care Alliance, your primary healthcare may be provided by Tufts Medical Center, Lowell Community Health Center, Lowell General Hospital or MelroseWakefield Hospital. These primary care providers, or PCPs, formed an accountable care organization, or ACO, to deliver primary care and care coordination to their MassHealth patients.

WellSense Health Plan has partnered with these providers as WellSense Care Alliance to provide MassHealth insurance coverage to their patients. We also partner with several other ACOs to do the same.

Each of these ACOs, including the one your PCP has joined, has made a commitment to the MassHealth program to promote health equity and close health disparities within the communities we serve together.

Below is a summary of the health equity activities that your PCP's ACO is pursuing for their MassHealth members. We are excited to collaborate with your PCP's ACO and our other ACO partners as they carry out their individual health equity initiatives.

We are sharing this summary of the health equity strategic plan that your PCP's ACO submitted to MassHealth to help our members understand what their healthcare providers are working on.

Thank you,

WellSense Health Plan

# Health Equity Strategic Plan (HESP) Executive Summary for WellSense Care Alliance ACO (WLS-CARE)

As submitted on December 31, 2023

**How the ACO/MCO defines health equity.** The ACO uses [MassHealth's](#) definition of health equity: "Health Equity is the opportunity for everyone to attain their full health potential, with no one disadvantaged from achieving this potential due to socioeconomic status or socially assigned circumstance."

**What the ACO/MCO hopes to achieve in the next four years related to health quality and equity.** The ACO and its providers have been investing in the data infrastructure and training to increase our ability to collect data and stratify data. Our general desires are to establish baselines for our data density, then increase that density year after year. As the data grows, we will have the ability to stratify data, implement interventions, and connect people to services to improve outcomes for our patients.

**How the ACO/MCO considers member and community experiences in overall health equity efforts.** Much of our early efforts have been informed by the Community Health Needs Assessment (CHNA) process that our anchor institutions participate in. The CHNA process provides patient and community feedback and collects data on the communities and their needs in our service area.
