

WellSense Clarity plans Formulary

(List of Covered Drugs)

Thank you for being a WellSense member. We're committed to providing comprehensive prescription drug coverage. This document is the complete list of pharmacy drugs and supplies, also called a formulary, that are covered by WellSense under your plan. It can help you and your healthcare providers understand your prescription drug coverage.

Inclusion of a pharmacy drug or item in this formulary doesn't guarantee coverage. A medicine listed in this guide doesn't mean we'll pay for it. For example, some drugs may need prior authorization, or approval, for us to pay for them. In other cases, we may only pay for certain amounts or strengths.

This drug list is effective for plan year 2025.

It's updated monthly and the last update was on November 1, 2024.

The prescription drugs in this list have been added to the WellSense Clarity plans formulary for their reported medical effectiveness, safety and value. All the drugs in this formulary are approved by the U.S. Food and Drug Administration (FDA) and have been reviewed by our Pharmacy and Therapeutics Committee, a group of medical practitioners with expertise in evaluating the effectiveness of drugs in treating various conditions.

What's a formulary?

A formulary is a list of prescribed medications or other pharmacy care products, services or supplies chosen for their safety, cost and effectiveness. The formulary lists medications by categories or classes and also sorts them into cost levels known as tiers. This list is guided by the Pharmacy and Therapeutics Committee. The committee reviews which medications will be covered, how well the drugs work, their safety and their overall value in treating a specific condition.

Your plan's formulary may change over time, such as when new drugs and generics become available, existing medications are approved for new disease categories, drugs

have been withdrawn from the market for safety reasons or a medication becomes available without a prescription.

Which drugs are included in the formulary?

This formulary is a complete list of prescription drugs that are included under your pharmacy plan.

Our list of covered drugs includes both brand-name and generic drugs. Brand-name drugs have the name the drug company that developed the drug gave it. Brand-name and generic drugs are functionally identical, but generic drugs generally cost less. For example, simvastatin is a commonly prescribed drug used to help control cholesterol. It's sold both as a generic and under the brand name Zocor. You can learn more about generic drugs on [the FDA's website](#).

How do I use the formulary?

You can look for your drug by searching the drug name within the document or using the index at the end of this document. If you already know what your drug is used for, you can also look for the relevant section in the Table of Contents.

Sections are based on what the drugs are used to treat. For example, drugs used for a heart condition are under "Cardiovascular, Hypertension & Lipids." The first column of the chart lists the drug name. Brand-name drugs are upper-case (e.g., ELIQUIS). Generic drugs are shown in lower-case italics (e.g., atenolol).

Drugs used to treat multiple conditions

Some drugs in the same dosage form may be used to treat more than one medical condition. In these instances, each medication is classified according to its first FDA-approved use. Please check the index of your formulary if you do not find your particular medication in the class/condition section that corresponds to your use.

What are tiers?

This formulary contains tiers that will help you find out how we cover a drug. Each drug on the formulary is in a tier. Each tier represents a different cost level for what you pay for a medication (what you pay for a given drug is also called your cost share). Locate your drug in the formulary and check the coverage information to the right of the drug name. This information will tell you what tier your drug falls in as well as any special requirements/limits on that drug. In most cases, they're structured in a general order from lowest to highest level of cost-share.

Below is a summary of tiers and the types of drugs included in each tier. Please refer to your plan documents to determine your copay level for Tiers 1 – 4.

Tier	What drugs are included
Tier 1	Most generic drugs
Tier 2	Some generic drugs and preferred* brand drugs
Tier 3	Non-preferred brand drugs
Tier 4	Specialty drugs**

*Preferred brand drugs are brand name drugs determined by the Pharmacy and Therapeutics Committee to be among the most effective and cost effective.

**Specialty drugs are drugs filled by a specialty pharmacy and limited to a 30-day supply. These are prescription medications that often require special storage, handling and close monitoring by you, your doctor or pharmacist.

Glossary

Below is list of common abbreviations and their meaning.

ACA: Affordable Care Act

Certain preventive medications, as described in the Patient Protection and Affordable Care Act and detailed by the U.S. Preventative Services Task Force, are covered without cost-sharing with a prescription when provided by a participating retail or mail order pharmacy. These medications may have specific requirements for age, condition and the way they're being used.

LA: Limited availability

For some medications, you need to use specified pharmacies to fill your prescription because the drug is only made available by the manufacturer to very limited pharmacies. Some of these medicines may be specialty medicines filled at a specialty pharmacy that specializes in particular classes of medication and health conditions.

MB: Medical benefit

Some medications are covered under your medical benefit. These medications are

1155 Elm Street, 5th Floor Manchester, NH 03101

wellsense.org

typically physician administered. Prior authorization may be required apply, please refer to your plan.

OC: Oral chemotherapy drugs

Oral chemotherapy drugs are medications used to treat different types of cancer. They're taken in the form of pills, capsules or liquids.

OTC : Over-the-counter

An OTC drug is a non-prescription drug.

PA: Prior authorization

Prior authorization is the requirement that your healthcare provider obtain approval for coverage or payment for prescription drugs from us before you fill your prescription. Without prior authorization, your prescription won't be covered at a pharmacy.

QL: Quantity limit

We limit the amount that we'll cover for certain drugs. These limits are designed to allow a sufficient supply of medication based on FDA-approved maximum daily doses, standard dosing and/or length of therapy of a drug.

SP : Specialty drugs

Specialty drugs are generally drugs used to treat rare, complex or chronic diseases; have complex storage and/or shipping requirements; or require comprehensive patient monitoring and/or education. We usually require that you fill specialty drugs at a designated specialty pharmacy.

ST: Step therapy

In some cases, the plan requires you to first try certain drugs to treat your medical condition before we'll cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A doesn't work for you, we'll then cover Drug B.

Are over-the-counter (OTC) drugs covered?

In general, over-the-counter (OTC) drugs are not included in the pharmacy benefit. However, there are certain OTC drugs that are covered with a prescription. These drugs will be listed on the formulary. Examples of OTC drugs covered on the formulary include diabetic test strips and certain preventive medications under the ACA, such as insulin and smoking cessation products. Please note that only certain OTC drugs listed

in the formulary are covered by the plan. These drugs can be identified when you see OTC under the Requirements/Limits section next to the drug name. All other OTC medications aren't covered.

Are there any drug exclusions on my formulary?

Our pharmacy program doesn't cover all drugs and prescriptions. Some exclusions on this plan include, but are not limited to: experimental or investigational drugs, drugs that haven't been approved by the FDA, drugs to treat sexual dysfunction, drugs used for fertility, drugs used primarily for cosmetic purposes, weight loss drugs and prescription drugs used primarily for the treatment of the symptoms of a cough or cold.

What if I don't see the drug I need?

If your doctor decides it's medically necessary for you to take a drug not listed, they can submit a coverage request to WellSense Health Plan through the ePA portal, via fax to 833-951-1680 or by calling 877-417-0528

Can I receive a 90-day supply of my medication?

Our members may choose to have 90-day supplies of certain drugs, known as maintenance medications, sent to their homes instead of filling prescriptions at a local retail pharmacy. Maintenance drugs are medications filled regularly for conditions like diabetes, asthma, high cholesterol or high blood pressure.

Members can obtain a 90-day supply of most maintenance drugs at each fill by signing up for our mail order program with Cornerstone Health Solutions. Getting these medications delivered to your home costs less than picking them up at the pharmacy and means you won't have to visit the pharmacy to get your prescriptions.

To use the mail order service, you must first enroll with Cornerstone Health Solutions. To enroll in this service and begin getting medications in the mail you can:

- Call Cornerstone Health Solutions at 844-319-7588

1155 Elm Street, 5th Floor Manchester, NH 03101

wellsense.org

- Complete the [mail order enrollment form](#) and follow the instructions available on [our website](#).

Your prescribing provider may also call Cornerstone Health Solutions at 844-319-7588 or fax your prescription to 781-805-8221.

Once you've enrolled, you can refill prescriptions by mail, phone [or online](#).

Once Cornerstone has your prescription and enrollment information, you can expect to receive your medications in 5-7 business days.

Can the formulary change?

Yes. We review and update the formulary as needed. New medicines may be added, and medicines deemed unsafe by the FDA or a medication's manufacturer are immediately removed.

Appealing a decision

If a request for prior authorization or exception results in a denial, you, your appointed representative or your prescribing provider (if granted your consent) may file an appeal. Both you and your provider will receive written notification of a denial, which will include the appropriate telephone number and address to direct an appeal. We recommend that your provider be involved in any appeal to provide additional information that may be needed.

This Guidebook includes information accurate at the time it was collected from Express Scripts' systems and may not reflect actual benefit setup details at later times.

List of Abbreviations

1: Generic

2: Preferred Brand

3: Non Preferred Brand

4: Specialty

MB: Medical Benefit. These drugs are covered through the medical benefit. Prior authorization may apply. Refer to the WellSense website.

ACA: Affordable Care Act.

HCV: Hepatitis C. For members in Bronze 6500, Silver Zero, Silver Zero Core 1, Silver Zero Core 2, and Silver Zero Core 3 these drugs are covered at the Tier 2 co-insurance.

OTC: Over the Counter. An OTC drug is a non-prescription drug.

PA: Prior Authorization. The Plan requires you or your physician to get prior authorization for certain drugs. This means that you will need to get approval before you fill your prescriptions. If you don't get approval, we may not cover the drug.

QL: Quantity Limit. For certain drugs, the Plan limits the amount of the drug that we will cover.

SP: Specialty. For certain specialty drugs, the Plan requires you to fill your prescription through our preferred specialty pharmacy partners.

ST: Step Therapy. In some cases, the Plan requires you to first try certain drugs to treat your medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat your medical condition, we may not cover Drug B unless you try Drug A first. If Drug A does not work for you, we will then cover Drug B.
